

Fifth Addenda to Criticism of the Current Science in the World

Pejman Malekinejad

From TUV NORD Iran Company

Abstract: *This article is as a proof to my previous papers [1-7] which confirms and approves them internationally. Also some scientific problems of Iran were discussed. Again it was concluded that Iran (and I) will not become anything in the science, I do not have any intelligence and (Iran and I) will not become anything in general. Therefore according to the principles of DEPRESSIVE REALISM, I must always be happy. It was suggested that the only way for the general advancement of Iran is to make Iran as a state of USA officially*

Keywords: Superpowers, Encyclopedia, Science, DEPRESSIVE REALISM.

1. Introduction

Voice of America (VOA Persian) has issued an article [8] that is in the same line with this paper. In fact, that article from VOA Persian confirms this paper. Also Eminent Crown Prince of Iran, Reza Pahlavi has a saying from Atamalek Joveini about Iran Islamic Regime as “They came and dug and burned and killed and took away and went” [9] which approves this paper.

2. DISCUSSION

I have previously said that “**A LARGE PART OF DISCOVERED SCIENCE IS KEPT SECRET AND IS NOT REVEALED TO PUBLIC**” [1-7]. This fact is officially and exactly said and mentioned in “*The Encyclopedia of World Problems and Human Potential*” in internet [10]. This encyclopedia officially says that “**A CONSIDERABLE AMOUNT OF SCIENTIFIC RESEARCH IS CONDUCTED IN INSTITUTES OR UNDER CONTRACTS WHICH PRECLUDE DISSEMINATION OF THE RESULTS TO OTHER THAN A SELECT GROUP**”. Therefore my previous papers [1-7] are approved and confirmed.

“*The Encyclopedia of World Problems and Human Potential*” [11] is the result of an ambitious effort to collect and present information on the problems with which humanity is confronted, as well as the challenges such problems pose to concept formation, values and development strategies. Problems included are those identified in international periodicals but especially in the documents of some 70,000 international non-profit organizations, profiled in the Yearbook of International Organizations. The Encyclopedia includes problems which such groups choose to perceive and act upon, whether or not their existence is denied by others claiming greater expertise. Indeed such claims and counter-claims figure in many of the problem descriptions in order to reflect the often paralyzing dynamics of international debate. In the light of the interdependence demonstrated among world problems in every sector, emphasis is placed on the need for approaches which are sufficiently complex to encompass the factions, conflicts and rival worldviews that undermine collective initiative towards a promising future. (This paragraph is given here from

the official website of “*The Encyclopedia of World Problems and Human Potential*” [11] for the purpose of clear and best introduction to that encyclopedia).

Therefore it can be concluded that I will not become anything in the science, I do not have any intelligence and I will not become anything in general. So according to the principles of DEPRESSIVE REALISM, I must always be happy. Since “**A LARGE PART OF DISCOVERED SCIENCE IS KEPT SECRET AND IS NOT REVEALED TO PUBLIC**”, then I will have no intelligence because I cannot solve most of world scientific problems and also I do not have access to a large part of discovered science. Therefore again according to the principles of DEPRESSIVE REALISM, I must always be happy. This fact is also true about all Iranians. I.e. since “**A LARGE PART OF DISCOVERED SCIENCE IS KEPT SECRET AND IS NOT REVEALED TO PUBLIC**”, then Iran will not become anything in the science and will not become anything in general. This is because the sciences of superpowers (as the main and only source of science) are kept secret. This principle that “**A LARGE PART OF DISCOVERED SCIENCE IS KEPT SECRET AND IS NOT REVEALED TO PUBLIC**” is not invented, discovered or created by me. It was said by my university professor “Mohammad Jamialahmadi” whose resume can be found in internet [12]. Also “*The Encyclopedia of World Problems and Human Potential*” says it exactly and officially as mentioned above [10]. Therefore according to the principles of DEPRESSIVE REALISM, I must always be happy since this principle is not mine. So I am not intelligent at all. As a result I must always be happy according to the principles of DEPRESSIVE REALISM.

I strongly believe that DEAR EMINENT MR. PRESIDENT DONALD J. TRUMP is the greatest president of USA ever and is the greatest politician (I mean scientist in the field of politics) in the world ever. Because His Excellency has worked on the greatest achievements of the world and USA and tried to improve them and replace them with better ones. I have previously mentioned an example as The Joint Comprehensive Plan of Action (JCPOA) [7]. As another example I can mention the NEW NUCLEAR PACT with both Russia and China. This news is up-to-date and is issued by the supreme news agency of BBC as: “US President Donald Trump has said he wants a new

nuclear pact to be signed by both Russia and China.” [13]. I should mention that I am not the first and only person in the world who has found the greatness of His Excellency. Many people in USA (United States of America) knew this fact who have voted His Excellency as the leader and president of USA. As a hint to this clue, I can mention one of the main, great and excellent quotes of His Excellency as **“WE MAKE AMERICA GREAT AGAIN”** which was repeated many times. Therefore according to principles of DEPRESSIVE REALISM, I must always be happy (Like all other people who knew this fact.).

Dear Eminent Mrs. Ivanka Trump, The daughter of Dear Eminent Mr. President Donald J. Trump who is currently the senior advisor to the president of the United States, has a very important, great and excellent quote about job creation as **“THE KEY TO JOB CREATION IS INNOVATION”** [14]. Unfortunately, we have nothing as innovation in Iran. In Iran, all the people are waiting for a company from a foreign country to come to Iran and construct the production line of a product in Iran (like BUICK, MACK, CHEVROLET, ROOTES GROUP, BENZ, SUZUKI, PEUGEOT, CITROEN, RENAULT, MVM, CHERRY, KIA ...), construct oil and gas refineries or petrochemical plants (like BP, TOTAL, ENI, CNPC, HYUNDAI, ...), construct a factory for producing a good in Iran and ... for some people to go to work. At the best conditions which is very rare, Iranians have copied the work of those foreign companies in Iran (like the factories who foreigners constructed in Iran and etc.). In this way Iran will always remain a dependent, retarded and underdeveloped country who follows superpowers. The politics of world is such that a country like Iran will always be dependent to the superpowers for its advancement and development and will always need them. Therefore the slogan of “DOWN WITH USA” from Iranians is in fact “DOWN WITH IRAN”. I clear here that this slogan is not my slogan and in fact I love USA.

The reason why those who masturbate will depress is that no much time is wasted during masturbation as of the time wasted during marriage and caring of children and as a result the person can study more. Therefore according to the principles of DEPRESSIVE REALISM one will depress. If I am the mastermind of the world and I should have a mental disorder according to the principles of DEPRESSIVE REALISM, then being a superpower does not mean anything.

There is a limit for assets of Iranians who studied at the universities and work according to their degrees as employees both in Iran and in foreign countries. This final limit is having a house and a car. There is a famous song from Iranian singer of Dariush Eghbali as “Booye Gandom” in which he sings as “... I am thinking of a house as large as you for sleep ...” which describes this social phenomena in the best way [15]. He is known as the greatest Iranian singer because he sings of grief. According to the principles of DEPRESSIVE REALISM, those artists who play as the mentally disordered people are the greatest artists both in Iran and in foreign countries like USA and HOLLYWOOD. Examples of these great USA artists are Dustin Hoffman who played in the RAIN MAN movie in 1988 for which he won the best actor Academy Award and Meryl Streep who played in IRON LADY movie in 2011 for which she won the best actress Academy Award.

There are some excellent, great and main references for these types of information who mention and discuss the political and scientific problems of Iran in details as the

international supreme news agencies of VOA Persian [16], BBC Persian [17] and etc.

3. CONCLUSION

The only way that I strongly suggest for the scientific and economic advancement and development of Iran in all fields (including politics) is to make, regard and announce Iran as a state of USA (United States of America) officially and politically (and totally). I.e. Iran should make and regard itself as a state of USA (United States of America) politically (and totally). I have heard that this idea was first suggested by His Majesty Mohammad Reza Shah Pahlavi for Iran.
